MARTINELLI

La FMN Martinelli nasce nel 1968 in un territorio, la Valle Sabbia, che ha nel proprio dna la passione e la tradizione del lavoro, valori che l'azienda assume come propria missione. Un forte senso della qualità del proprio prodotto è alla base di ogni decisione; partendo dalla progettazione e dalla scelta dei materiali, attraversando tutte le fasi di lavorazione, fino alla valorizzazione delle risorse umane, alla comunicazione, e alla diffusione di prodotti che si sono guadagnati riconoscibilità e fiducia da parte di una clientela internazionale che condivide i nostri stessi valori.

E' con la profonda convinzione che la tradizione e l'innovazione siano valori forti, capaci di creare sinergia e sviluppo, che FMN Martinelli presenta e comunica la propria immagine e il proprio lavoro.

La tradizione parte da un materiale antico come l'ottone, lavorato e forgiato in forme che il tempo ha reso classiche e moderne. Impianti produttivi posti su un'area di 10.000 mq, al servizio di un'organizzazione del lavoro attenta a criteri di efficienza e sicurezza, realizzano linee di maniglie dove gusto classico e contemporaneo s'incontrano.

L'innovazione si esprime nella linea "dnd" (diffusione nuovo design), divisione interna che, nata come naturale risposta ad un mercato in costante evoluzione, vuole indicare nuove direzioni in termini di design e qualità.

*FMN Martinelli was established in 1968 in the Valle Sabbia, a region of Northern Italy which traditionally maintains its expertise and passion for brass foundry products, it's in our genes. These same values are still reflected today in our current mission statement for the Company.*

## LA NUOVA SFIDA

### **Riteniamo l'azienda creatrice di valori, oltre che di prodotti.**

Nel marketing comunicazionale ogni azienda è sempre più percepita come realtà che propone valori oltre che prodotti, comunicati e fruiti come elementi di identità e posizionamento. Questi valori "immateriali", ma molto concreti, formano la corporate identity.

### **La creatività risponde a tre elementi coordinati.**

- identificazione coerente: l'immagine dell'azienda deve presentarsi in maniera comprensibile, distinguibile: Le differenti parti attive che lo compongono devono essere correlate tra loro, in modo da restituire sempre un quadro generale.

- riverberazione segnica: il brand deve riuscire a esprimere, anche in territori applicativi diversificati, la sua missione e i suoi obiettivi, tramite l'uso di segni condivisi

- posizionamento: il brand, tramite un linguaggio visuale appropriato, deve posizionarsi sul mercato e riuscire a distinguere se stesso e i suoi prodotti dalle imprese concorrenti

### **I valori di riferimento.**

- attenzione al design (ma più in generale agli stili contemporanei)
- capacità di unire estetica e funzionalità
- innovazione senza rinunciare alla tradizione
- internazionalità, pur ribadendo l'originale made in Italy

dnd® è il nuovo marchio di fabbrica della FMN Martinelli S.p.A. Nato nel 1998 allo scopo di dare un esito produttivo a un aspetto della nostra attività che è spesso solo sulla carta o allo stadio di prototipi: il desiderio di portare avanti ricerche con un alto grado di innovazione formale, costruttiva e funzionale, anche di tipo sperimentale, libere dai limiti normalmente imposte dalle produzioni industriali di grande serie.

Desideriamo offrire ad un pubblico attento e culturalmente curioso un ampio spettro di proposte con la ricerca condotta di alcune delle personalità più interessanti dell'attuale panorama del disegno industriale.

Non antagonista, ma complementare alla produzione con il marchio "martinelli" (che continua la strada che è la propria degli oggetti di grande serie per il vasto pubblico, documentata dall'annuario della produzione martinelli), proveniente dalla stessa fabbrica di Casto e dalle sue abili maestranze. la nuova produzione con il marchio "dnd" si ritaglia dunque nuovi spazi nel panorama sempre più articolato e complesso del mercato contemporaneo.

## THE NEW CHALLENGE

### **We consider the Company creator of values, not just products.**

*In communication marketing, each Company is perceived more and more as an entity offering values, in addition to products, information and benefits, as tools for defining its identity and position. These "immaterial" but very tangible values are what build the corporate identity.*

### **Creativity provides the answer to three interlinked elements**

- *Consistent identification: the Company image needs to be presented in a way which is comprehensible and unique. Its various active components need to be correlated and capable of presenting a general view.*

- *Graphic representation: the brand needs to clearly express the Company's mission and objectives, by means of widely understood symbols and within varied fields of application.*

- *Positioning: the use of an appropriate visual language needs to be implemented, ensuring that the brand finds its proper positioning within the market and separates itself and the products it represents from competing organisations.*

### **The reference values**

- *attention to design (and, in more general terms, to contemporary styles)*
- *ability to combine aesthetics to functionality*
- *innovation and research without renouncing to the tradition*
- *internationality, whilst emphasizing the "Made in Italy" concept*

*dnd® is a new brand name of FMN Martinelli S.p.A.*

*Born in 1998 to give a production answer to our activity specifics which are often only on paper or at the stage of prototypes: the desire of bringing forward researches with a very high degree of formal innovation, constructive and functional, even experimental, free from the limits normally given by the industrial productions of big series.*

*We wish to offer to an attentive and culturally curious public a wide spectrum of proposals made by some of the most interesting personalities in the current Industrial Design panorama.*

*Not antagonistic, but complementary with the "martinelli" brand (which continues its own way for the objects directed to the wide public, showed in the Martinelli catalogue) the new production with the brand "dnd", originated by the same Factory at Casto and capable craftsmen, has his own and new scopes in the more and more complex and articulate panorama of the contemporary market.*
